**ANEXO: Inventario de especies de los espacios a tratar**

Este documento recoge la acción 2.1.2. Desarrollo de un estudio de línea base para el establecimiento de la metodología y el sistema de monitoreo para la conservación y gestión de los espacios naturales de la Red TREEMAC, donde se especifica la relación de especies presentes en los espacios a tratar bajo el Proyecto TREEMAC.

En este informe se recoge el inventario y el análisis del estado de conservación de las especies de flora y fauna, así como sus estatus de conservación a nivel científico y su nivel de protección legal.

El Proyecto TREEMAC en Mauritania se desarrolla en el Parque Nacional de Diawling, localizado al suroeste del país, en el delta del Río Senegal. Diawling es parte de una Reserva de la Biosfera Transfronteriza y constituye un lugar muy importante para muchas especies, especialmente de aves, debido a su combinación de agua dulce y salada.

El Parque Nacional de Diawling se encuentra dentro del Convenio de Ramsar o Convenio relativo a los Humedales de Importancia Internacional especialmente como Hábitat de Aves Acuáticas, un tratado intergubernamental aprobado en 1971, entrando en vigor en 1975. Su ficha del Servicio de Información sobre Sitios Ramsar puede encontrarse en la página web [www.ramsar.org](http://www.ramsar.org)

Parc National du Diawling	
País	Mauritania
Número de sitio	666
Área	15.600 ha
Fecha de designación	23-08-1994
Coordenadas	16 ° 22'N 16 ° 22'W
Región administrativa	Willaya du Trarza

Este informe contempla las especies de fauna y flora más representativas de los humedales del Parque Nacional de Diawling, analizando el estado de conservación y su clasificación según la Lista Roja de UICN para cada una de dichas especies. Toda la información ha sido recopilada gracias a la información aportada por el Parque Nacional de Diawling, su página web (<http://www.pnd.mr/pnd/>) y sus documentos asociados. Complementariamente y debido a su trascendencia, se aporta el listado completo de aves de Mauritania contemplados en la Lista Roja de UICN.
